

GREAT AUSTRALIAN BIGHT...

...CEDUNA & DUNTROON SUB-BASINS

The Duntroon project consists of approximately 4,000 km of PSTM reprocessed 2D seismic data. The data straddles the Duntroon and Ceduna sub-basins.

The Great Australian Bight data package is a joint project with MCG and provides a superior starting point for evaluation of this exciting frontier region.

- PSTM reprocessed 2D seismic data
- Post-stack reprocessed 3D seismic
- New high resolution aeromagnetic data
- Existing satellite gravity and marine gravity data
- Satellite seep data
- Integrated interpretation report
