

# NEW ZEUS 3D...

## ...NON-EXCLUSIVE SEISMIC SURVEY

Fugro has recently acquired the Zeus 3D project over the Exmouth Plateau, Carnarvon Basin. The survey is ~2,000 km<sup>2</sup> and covers the WA-361-P and WA-388-P permits as well as ~650 km<sup>2</sup> of vacant acreage.

The survey area is within Australia's premier hydrocarbon province and next to producing fields and existing infrastructure.

The survey aims to clearly define play levels in the area including the Triassic Mungaroo fault blocks to the south at the Goodwyn gas field.
